This report studies the Glass Packaging market. Glass Packaging is a widely accepted packaging method where glass is the trusted and proven packaging for health, taste and the environment. Glass is also the only widely-used food packaging granted the FDA status of 'GRAS' or generally recognized as safe - the highest standard. Global glass packaging market is bifurcated on the basis of product into soda lime, de-alkalized soda lime, and borosilicate types. Popularly known as soda lime silica glass, soda lime product is commonly used in the food & beverages industry. It is also used for containers and windows. Soda lime product type holds a substantial share in the entire glass packaging market. Borosilicate type is formed using major constituents such as boron trioxide and silica. It is subject to less thermal stress and finds application in reagent bottles construction.
