The global Glucuronic Acid market was valued at 1.98 Million USD in 2021 and will grow with a CAGR of 3.99% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Glucuronic acid is a uronic acid formed by the oxidation of the C-6 hydroxyl group of glucose to a carboxyl group. D-glucuronic acid does not generally exist in free form, as this form is unstable, but rather in the more stable 3,6-lactone form of the furan ring. D-glucopyranuronic acid is present in oligosaccharides at the junction of glycosaminoglycan chains, as well as in heparin and chondroitin. The number of players in the global glucuronic acid market is limited, and most of them are concentrated in China, such as Anhui Hegeng Biology, Beijing Chemsynlab, Shanghai Meng Yabio, etc. Among them, Anhui Hegeng Biology is the largest player .
