Combine harvester, also was known as combine in the early 1950s, is a joint machine that capable of complete reaping, threshing, and winnowing in crop harvesting into a single process. Combine harvesters are one of the most economically important labor-saving inventions, significantly reducing the fraction of the population that must be engaged in agriculture. The market concentration rate of grain combine harvester is high. Though there are many small players in China, the leading brands occupy large market share. Top 5 took up more than 69.9% of the Chinese market in 2017.
