The global Grain Processing Machinery market was valued at 3959.59 Million USD in 2021 and will grow with a CAGR of 4.21% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Grain processing machinery can be classified into automatic and semiautomatic. Automatic machinery requires zero or very minimal human interference, whereas semiautomatic machinery requires human help. Automatic machinery is more expensive than semiautomatic machinery. Many food processing companies install grain processing machines in order to process grains domestically at their plants. Based on distribution channel, the grain processing machinery market can be classified into online channel and offline channel. The offline channel segment means direct procurement of machinery from the manufacturers. The online channel segment is expected to expand at a rapid pace during the forecast period due to increase in demand for grain processing machinery from consumers and manufacturers to cater to every possible region.
