Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Glass Reinforced Plastics (GRP) are a composite consisting of at least two different materials. The benefits of each material are united to achieve an overall effect. Glass Reinforced Plastic pipes are produced from glass reinforcements that are embedded in cured thermosetting resin. GRP invaded the piping industry due to its corrosion resistance capabilities and have been preferred as alternative to steel and stainless-steel pipes.
