Hand soldering is to connect two points. These points can be component or PCB layer or wire. Hand soldering melts a metal wire, called solder, and flows over the two points. Hand Soldering Iron is powered by electric power, which heats a rod, on tip of which the solder melts and helps to join. On cooling the points are together as solid. Soldering helps to connect electronic components to perform many functions. This report we mainly study Hand soldering products like Soldering Irons, Soldering Stations and other tools. Global Hand Soldering key players include Weller (Apex Tool Group), QUICK Soldering, JBC and Kurtz Ersa, etc. global top four players hold a share about 45%.
