The global HDPE Microduct market was valued at 288.72 Million USD in 2021 and will grow with a CAGR of 7.19% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

HDPE Microducts are small ducts for the installation of small microduct fibre optic cables. They have a size ranging from typically 3 to 16 mm and are installed as bundles in larger ducts. HDPE microtubules play an important role in many situations. The huge downstream demand has driven the production of HDPE microtubes. The main sales markets are located in North America. After sweeping Europe, the Asia-Pacific region and North America also have strong purchasing markets. Europe is the region that consumes the most HDPE, with a market share of more than 50 percent in 2019.
