HDPE pipe is a pipe made from high-density polyethylene. Known for its large strength to density ratio, it can carry potable water, wastewater, slurries, chemicals, hazardous wastes, and compressed gases. HDPE pipe category demonstrates high growth prospects among leading plastic pipe resin categories. And now the main types of HDPE are PE80 and PE100, which take 93.11% of global production in 2016. HDPE pipe downstream is wide, and the major fields are water supply, oil and gas, sewage systems, agricultural applications, etc. In recent years, real estate industry has developed rapidly. Increasing demand for water supply is expected to drive the demand for the HDPE pipe market. Water supply is the largest downstream of HDPE pipe, taking 39.22% of the world HDPE pipe in 2016. The consumption of HDPE pipe is distributed in United States, China, Russia, Germany and France. United States is the largest consumption country of HDPE pipe in the world in the past five years followed by China closely and it will keep the same position in the next six years with the CAGR of 7.5%. The United States market takes up about 29.58% in the global consumption in 2016. China takes 20.30% of global consumption. The global production continues to increase with the global demand increasing. In 2016, the global production is 4.2 million

K MT from 3.6 million MT in 2012 with the CAGR of 4%. The market concentrate is not high for one hand the technology is relatively easy and technological barrier is not high, for another hand the market is huge and there are large profits so many companies come into this industry. In the world, the main manufacturers include JM Eagle, Chevron Phillips Chemical Company, Aliaxis, WL Plastics, LESSO and so on. In 2016, the top 3 manufacturers sale were 1102.3 K MT, which take 25% of the global consumption. According to our research and analysis, manufacturers from North America and Europe are the major leaders in the international market of HDPE pipe. Manufacturers from China are immature in technology. There is large space in the China market, as well as big gap between international brands and local brands on price.
