Heart rate monitoring devices are used to measure or record heart rate of an individual person. Additionally, heart rate monitors can be very useful in terms of exercise or workout in order to maintain heart rate of an individual such as aerobic and fat burning zone. Chest strap heart rate monitoring devices are most effective heart rate monitors among other monitors, when strapped around an individual's chest they provide precise accuracy of an individual's heart rate. Wearable heart rate monitors are very popular these days due to their capability to be used in almost every kind of exercises such as jogging, hiking, cycling, running, swimming, climbing or when rehabilitating from an injury. According to the report, rise in smartphone penetration will be a key driver for market growth. The rise in the use of smartphones has fueled the global heart rate monitoring device market. Diagnostic wearable devices produce a large amount of health data. However, the analysis of this raw data has been a challenge. Smartphones and related apps are required for better processing and analysis of health information.
