The global Heat Guns market was valued at 122.33 Million USD in 2021 and will grow with a CAGR of 5.06% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A heat gun offers instant, powerful, controlled heat that can be focused on an object, surface, or specific area. Safer than open flame, heat guns have largely replaced primitive means of applying intense heat. It is similar in appearance and construction to a hair dryer, but the air it emits is at a much higher temperature. Air is forced over the element and heated. Typically, the air emitted can reach temperatures between 200° and 1,000° Fahrenheit (93° to 537.7° Celsius). In the coming years there is an increasing demand for Heat Guns in the regions of US and Europe that is expected to drive the market for more advanced Heat Guns. Increasing of industrial fields expenditures, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of Heat Guns will drive growth in China markets. Globally, the Heat Guns industry market is low concentrated as the manufacturing technology of Heat Guns is relatively matures than some high-tech equipment. And some enterprises, like Steinel, Weller, Milwaukee, etc. are well-known for the wonderful performance of their Heat Guns and related services. At the same time, Asia-Pacific, occupied 38.27% sales market share in 2016 is remarkable in the global Heat Guns industry because of their market share and low cost of raw

material and labor. The sales of Heat Guns are related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of Heat Guns industry may not keep that fast. But it is surely forecasted that the market of Heat Guns is still promising. The product average price declined in the past few years due to the technology development, the average price will keep the trend in the few future years due to increasing mature manufacturing technology and lowering cost of raw materials. With emerging economies growing faster, a strategy has been adopted by most leading vendors in the Heat Guns market to approach these areas. GIR analysis of the Heat Guns market indicated that Europe would account for the highest sales revenue in 2021 with close to 37 percent of global sales coming from this region, but Asia has the highest growth rate. Vendors recognize the importance of this region, particularly in China, and are working towards penetrating this market by strengthening their sales and distribution networks. Although the market competition of Heat Guns is fierce globally, there are many enterprises can obtain considerable profit form the manufacturing and marketing of Heat Guns and that is the reason that we believe there will also be enterprises enter this market. But it is suggested that enterprises those have plans to enter this industry have careful analysis of this market and the advantages or disadvantages of themselves.
