The global Heat Pumps market was valued at 61.33 Million USD in 2021 and will grow with a CAGR of 5.14% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A Heat Pump is a device that provides heat energy from a source of heat to a destination called a 'heat sink'. Heat pumps are designed to move thermal energy opposite to the direction of spontaneous heat flow by absorbing heat from a cold space and releasing it to a warmer one. A heat pump uses some amount of external power to accomplish the work of transferring energy from the heat source to the heat sink. Daikin, Mitsubishi and Atlantic captured the top three revenue share spots in the Heat Pumps market in 2015. Daikin dominated with 21.83 percent revenue share, followed by Mitsubishi with 8.47 percent revenue share and Atlantic with 7.00 percent revenue share. In the next five years, the global consumption of Heat Pumps will show upward tendency further, consumption is expected in 2020 will be 5814.60 (K units). The average operating rate will remain at 83% to 85%. In terms of the segment, the Air to Water Monobloc segment was the largest contributor in the Heat Pumps market. In 2014 the Air to Water Monobloc segment amounted for 76.03% revenue share. Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area, in future still more new investment will enter into the field. Technology and cost are two major problems. Although sales of Heat Pumps

brought a lot of opportunities, for the new entrants with only advantage in capital without sufficient support in technology and downstream channels, the research group did not recommend taking risk the enter this market.
