### Abstracts

The global Heat Sinks market was valued at 127.08 Million USD in 2021 and will grow with a CAGR of 4.88% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A heat sink (also commonly spelled heatsink) is a passive heat exchanger that transfers the heat generated by an electronic or a mechanical device to a fluid medium, often air or a liquid coolant, where it is dissipated away from the device, thereby allowing regulation of the device's temperature at optimal levels. In computers, heat sinks are used to cool central processing units or graphics processors. Heat sinks are used with high-power semiconductor devices such as power transistors and optoelectronics such as lasers and light emitting diodes (LEDs), where the heat dissipation ability of the component itself is insufficient to moderate its temperature. In the coming years there is an increasing demand for Heat Sinks in the regions of North America, Europe and Asia. In the past few years from 2013-2017, the global production and consumption developed stably. The global Heat Sinks market size in terms of production is projected to grow to 2447 M Pcs by 2025. At the same time, China is remarkable in the global Heat Sinks industry because of their market share and technology status of Heat Sinks. Other developing countries/region such as India and Southeast Asia grow at a good pace owing to large population and high economic growth rate, and they will play important role in the future. In the future, the production and consumption is estimated

to continue developing with a stable growth rate. To meet the large and increasing demand, more and more manufacturers will go into this industry.
