### Abstracts

The global Heavy Rail market was valued at 640.53 Million USD in 2021 and will grow with a CAGR of 5.62% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

This report studies the Heavy Rail market. Rail is the most important component of rail track system. The train will run on the parallel rails, carrying passengers and freight. Fixed on the sleepers, rails pass the load of trains to sleepers. Rails generally described and specified by their weight per unit length. The minimum weight per meter of rail required depends on the maximum axle load of the trains that will run on the track. Generally, the heavier the rails and the rest of the track work, the heavier and faster the trains these tracks can carry. Rails represent a substantial fraction of the cost of a railway line. Only a small number of rail sizes are made by steelworks at one time, so a railway must choose the nearest suitable size. Heavy Rail is defined as the Rail weight is higher than 30 Kg/m. The global average price of Heavy Rail is in the decreasing trend, from 825 USD/MT in 2012 to 679 USD/MT in 2017. In fact, the price was rising since 2016 as the price of steel. With the situation of global economy, prices will be in increasing trend in the following five years. The classification of Heavy Rail includes 30-40 Kg/m Rail, 40-50 Kg/m Rail, 50-60 Kg/m Rail and Above 60 Kg/m Rail. The proportion of 30-40 Kg/m Rail in 2017 is about 30.82%, and the proportion is in decreasing trend from 2012 to 2017. China is the largest supplier of Heavy Rail, with a

production market share nearly 35.98% in 2017. Europe is the second largest supplier of Heavy Rail, enjoying production market share nearly 28.28% in 2017.
