## Abstracts

The global Helicopter Blades market was valued at 408.92 Million USD in 2021 and will grow with a CAGR of 2.71% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Helicopter blades are crucial components of a rotorcraft as they are accountable for effective aerodynamic forces which offer safety. The constantly growing demand for helicopters has propelled vendors to focus on using new technologies such as additive manufacturing (AM) for value creation in prototyping, tooling, concept modeling, and production of selected components. Increasing deliveries of helicopters, advancement in the blade technology such as electric tail rotor systems, continuous shift from heavy metal blades to lightweight composite blades, and rising helicopter fleet size are some of the major growth drivers of the global helicopter blades market. Military and civil/military segments currently dominate the helicopter blades market, driven by high deliveries of helicopters and large fleet size. However, civil and parapublic segment is projected to witness the highest growth during the forecast period, driven by increasing demand for light single-engine and intermediate & medium twin-engine civil helicopters.
