Heparin, a highly sulfated glycosaminoglycan, is widely used as an injectable anticoagulant, and has the highest negative charge density of any known biological molecule. It can also be used to form an inner anticoagulant surface on various experimental and medical devices such as test tubes and renal dialysis machine. Heparin API is an anticoagulant (blood thinner) that prevents the formation of blood clots. With the accelerated pace of life and increasing aging population, global morbidity and mortality of cardiovascular and cerebrovascular disease are increased year by year.
