Abstracts

The global Hermetic Packaging market was valued at 3329.44 Million USD in 2021 and will grow with a CAGR of 5.39% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The need of a packaging method that can protect highly sensitive electronic components for several years and the growing demand for hermetically packaged components from industries, such as automotive, electronics, and aeronautics and space, are some of the major drivers for the hermetic packaging market. However, stringent military standards for hermetic packaging is a key factor restraining the growth of this market. The military & defense industry is expected to capture the largest market share in 2018. High defense budget allocation by the North American countries-the US, Canada, and Mexico; and rising adoption of hermetically packaged components for border security needs by developing countries, such as China and India, across APAC are expected to contribute to the growth of the hermetic packaging market for the military & defense industry.
