High-barrier packaging film is the premium choice packaging material for preserving product quality and freshness. At Eagle, we utilize high-barrier packaging to keep moisture, air and other elements sealed off from the contents inside your flexible pouch or bag. The rising demand for convenience and packaged foods, especially in developing countries, is one of the primary factors driving the growth of this market globally. The high barrier packaging films are extensively used for packaging fresh meat, processed meat, bakery products, and ready-to-eat meals. As the majority of these products can be simply heated and consumed, the primary consumers of these packaged products are working professionals, dual-earning families, and students. Therefore, the growing demand for convenient, ready-to-eat food will translate into the increasing demand for ready meals packaging material, such as high barrier packaging films, over the next four years.
