Abstracts

The global High Intensity Magnetic Separator market was valued at 227.02 Million USD in 2021 and will grow with a CAGR of 4.17% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

High intensity separators are used for cleaning of material from impurities as well as for concentration and accumulation processes for minerals. They are best used to separate fine particles which have poor magnetic properties. The utilization of extremely powerful permanentmagnetic material guarantees superior separation results. First, for industry structure analysis, the High Intensity Magnetic Separator industry is relatively unconcentrated. These manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. The top 3 players are Mineral Technologies, SLon Magnetic Separator Ltd and Metso, which accounts for 13.6% revenue of the global market. Second, the sales of High Intensity Magnetic Separator increased from 4145 Units in 2013 to 5297 Units in 2017 with an average growth rate of more than 6.32%. Third, Europe occupied 21.24% of the consumption volume market in 2017. It is followed by North America which have around 16.84% of the global total industry. Geographically, Asia-Pacific was the largest consumption market, which took about 32.36% of the global consumption volume in 2017. Fourth, for price trend analysis, a key variable in the performance of High Intensity Magnetic Separator producers is raw material costs, specifically the speed at which any increase

can be passed through to customers. Fifth, for forecast, the global High Intensity Magnetic Separator revenue would keep increasing with CAGR of 4.44%. We tend to believe that this industry still has a bright future, considering the current demand of High Intensity Magnetic Separator.
