The global High Potency Active Pharmaceutical Ingredients (APIs) market was valued at 1497.01 Million USD in 2021 and will grow with a CAGR of 4.39% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

High Potency Active Pharmaceutical Ingredients (APIs) have higher active level targeting severe diseases such as tumour cells, infected cells, damaged organs than regular medicine elements. Highly potent APIs are capable of targeting diseased cells selectively and more precisely than other compounds. Increasing incidence of cancer resulted in increasing R&D pertaining to anticancer drugs which thereby propelling the demand for HPAPIs over the forecast period. In addition, rising usage of HPAPI in gynecology & cosmetics are accounted for the further growth.
