Abstracts

The global High Pressure Laminate (HPL) market was valued at 760.25 Million USD in 2021 and will grow with a CAGR of 3.33% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Decorative laminates are laminated products primarily used as furniture surface materials or wall paneling. It can be manufactured as either high- or low-pressure laminate, with the two processes not much different from each other except for the pressure applied in the pressing process. High Pressure Laminate (HPL) is composed of resin-impregnated Kraft paper, decorative paper face material and a clear melamine-impregnated overlay. These sheets are bonded at pressures greater than 1000 pounds per square inch and temperatures approaching 300 F (149°C). HPL is available in hundreds of solid colors, wood grains and abstracts with multiple finishes to select from as well. High Pressure Laminates manufacturers range from large multinational corporations to small privately owned companies in this industry. The leading players are Wilsonart, Panolam Industries, Kronospan, EGGER and ASD, accounting for 50.01 percent revenue market share in 2017. For price trend analysis, a key variable in the performance of High Pressure Laminates producers is raw material costs, specifically the speed at which any increase can be passed through to customers. The market scale will keep increasing in the next few years. Although sales of High Pressure Laminates brought a lot of opportunities, the study group recommends the new entrants just having

money but without technical advantage and downstream support do not to enter into the High Pressure Laminates field.
