High Pressure Washer is a pressure washer or power washer that is a high-pressure mechanical sprayer used to remove loose paint, mold, grime, dust, mud, and dirt from surfaces and objects such as buildings, vehicles and concrete surfaces. The volume of a pressure washer is expressed in gallons or litres per minute, often designed into the pump and not variable. The pressure, expressed in pounds per square inch, pascals, or bar (deprecated but in common usage), is designed into the pump but can be varied by adjusting the unloader valve. As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with High Pressure Washer industry in short supply on the market in the past few years, more and more companies enter into High Pressure Washer industry, the current demand for High Pressure Washer product is relatively low, lack of demand, excess supply. Ordinary High Pressure Washer products on the market do not sell well; High Pressure Washer price is lower than past years. The signal of market price change indicates the trend in the High Pressure Washer industry, low-end product has excess capacity, and high-end product is in short supply.
