The global High Voltage Equipment market was valued at 8223.42 Million USD in 2021 and will grow with a CAGR of 4.01% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

High voltage equipment becomes the integral part of the transmission and distribution network. Power transmission includes equipment such as transformers and reactive compensation, breaker, protection and control and communication equipment and others. Continuously growing energy demand will continue to be the central market driver for transmission equipment. Continuous demand for electricity in highly populated countries such as India and China has improved the development of power T&D equipment. The length of the installed T&D lines over the next five years is likely to be the highest in Asia-Pacific among all regions. Moreover, the T&D expenditure in Asia-Pacific is also the highest. High voltage equipment is extensively used by utilities companies. North America and Europe currently have market for grid modernization and replacement of old installations. Along with the capacity enhancement trending world-wide, the investments in the offshore wind farms are expected to drive the market
