The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A high-voltage motor refers to a motor with a rated voltage above 1000V. The advantages of high-voltage motors are large power and strong impact resistance; the disadvantages are large inertia, difficult to start and brake. Asia Pacific occupied the largest revenue market share with 45% in 2019. It is followed by North America and Asia-Pacific. Other regions have smaller market. The developing countries such as China and India has large demand. The high voltage motor is relatively concentrated because of the technology barrier. Leading players such as Siemens, Wolong and ABB are remarkable in the high voltage motor industry because of their market share and technology status of high voltage motor.
