Hollow Blow Molding Machine is widely used in commercial beverage production, pharmaceutical, cosmetics, food and chemical industries. Hollow Blow Molding Machine creates a plastic bottle according to a recipe, for example specifying the capacity of the bottle to be made. The machine consists of molds, a programmable logic controller, and mechanical and electronic instruments. Hollow blow molding machine industry has low technology barrier and is labor intensive industry. Currently, there are several producing companies in the world hollow blow molding machine industry. The main market players are Sidel (Tetra Laval), Sipa, Krones, Bekum and Aoki Technical Laboratory. The production of hollow blow molding machine will increase to 5338 Units in 2016 from 4564 Units in 2011 with average growth rate of 3.18%. Global hollow blow molding machine capacity utilization rate remained at around 82.04% in 2015. In consumption market, the global consumption value of hollow blow molding machine increases with the 2.64% average growth rate. Europe and China are the mainly consumption regions due to the bigger demand of downstream applications. In 2015, these two regions occupied 50.34% of the global consumption volume in total. Hollow blow molding machine has mainly two types, which include extrusion blow molding machine and

injection blow molding machine. And each type has application industries relatively. With efficient effect of hollow blow molding machine, the downstream application industries will need more hollow blow molding machines. So, hollow blow molding machine has a huge market potential in the future. Manufacturers engaged in the industry are trying to produce high efficient and more functional hollow blow molding machine through improving technology. The major raw materials for hollow blow molding machine are casting parts, metal sheet and steel, etc. Fluctuations in the price of the upstream product will impact on the production cost of hollow blow molding machine. The production cost of hollow blow molding machine is also an important factor which could impact the price of hollow blow molding machine. The hollow blow molding machine manufacturers are trying to reduce production cost by developing production method. We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents fluctuation according to the economy development status and international competition. Also, there is fluctuation in gross margin.
