The global Homogenizers market was valued at 1366.03 Million USD in 2021 and will grow with a CAGR of 4.04% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A homogenizer is an integral part of the industrial mixer market. It is a pump that can produce high pressure. The degree of homogenization can be controlled using this equipment. It requires regular maintenance, as poor maintenance can cause inconsistent homogenization pressure. The apparatus mainly consists of a gearbox, frame pump, and pressure gauge. On the basis of type, the ultrasonic homogenizers segment accounted for the largest market share, in terms of both volume and value. Ultrasonic homogenizers are widely used for emulsifying various cosmetics and consumer durable products, such as skin lotions, pharmaceutical ointments, lubricants, and fuels, owing to its capability of dispersing of powders in liquid.
