Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Horizontal directional drilling (HDD), commonly called directional boring, is a steerable trenchless method of installing underground pipes, conduits and cables in a shallow arc along a prescribed bore path by using a surface-launched drilling rig, with minimal impact on the surrounding area. Directional boring is used when trenching or excavating is not practical. It is suitable for a variety of soil conditions and jobs including road, landscape and river crossings. According to types, the most proportion of the Horizontal Directional Drilling is Small HDD, taking about 57% sales share of global market in 2020. The most proportion of Horizontal Directional Drilling is used for Telecommunication and the proportion is about 27% in 2020. China is the major consumption region of the global market, which takes about 42% market share.
