The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Hot rolling is a mill process which involves rolling the steel at a high temperature (typically at a temperature over 1700° F), which is above the steel's recrystallization temperature. When steel is above the recrystallization temperature, it can be shaped and formed easily, and the steel can be made in much larger sizes. Hot rolled steel is typically cheaper than cold rolled steel due to the fact that it is often manufactured without any delays in the process, and therefore the reheating of the steel is not required (as it is with cold rolled). When the steel cools off it will shrink slightly thus giving less control on the size and shape of the finished product when compared to cold rolled. Hot Rolled Coils refers to the rolling of flat rolled sheet and coil products. The Hot Rolled Coils market is very dispersion market; the revenue of top twenty players accounts about 51% of the total revenue in 2017. The high-end products mainly come from China and Europe. The leading players mainly are ArcelorMittal, China Baowu Steel Group, Nippon Steel & Sumitomo Metal, JFE Steel Corporation, Ansteel Group, Tata Steel, Hesteel Group, POSCO, Nucor Corporation and Benxi Steel Group; ArcelorMittal is the largest players; its revenue of global market exceeds 6.8% in 2017. Geographically, the global Hot Rolled Coils market has been segmented into North

America, Europe, China, RoA, South Africa and RoW. The China held the largest share in the global market, its Consumption market share of global market exceeds 44% in 2017. The next is rest of Asia.
