HPMC Capsules are two-piece capsules made from cellulosic raw materials that satisfy vegetarian, religion, cultural and policy needs. These vegetable capsules are an attractive, all natural dosage form that retain all the advantages - easy to swallow, effectively mask taste and odor, and allow product visibility. These capsules are also starch-free, gluten-free and preservative-free, and meet the strict dietary needs of customers that choose a vegetarian lifestyle. HPMC (Hydroxypropyl methylcellulose) capsules have been developed for both Health Supplements products and Nutraceutical. The vegetarian capsules industry concentration is high because there are only several producers get the technology to produce the HPMC capsules. The production of HPMC capsules concentrated in Europe, USA, India and China. Capsugel, which now is a Lonza company, took a majority of sales market share, about 44% in 2019, followed by ACG Associated Capsules with a portion of around 12%. The key consumption markets locate at developed countries. The North America and Europe together take a market share of above 52%. In China market, vegetarian capsules percentage is very lower compared to the whole capsules market, and far lower than that of in developed regions, although it has a fast growth speed these two
