Human Coagulation Factor VIII is an essential blood-clotting protein, also known as anti-hemophilic factor (AHF). In humans, factor VIII is encoded by the F8 gene, defects in this gene results in hemophilia A. North America is the largest consumption market of Human Coagulation Factor VIII, with sales market share nearly 46%. And the production market share of Human Coagulation Factor VIII is 58%. The manufacturers of Human Coagulation Factor VIII in North America have big and medium scale. The second place is Europe, following North America with the sales market share of 36% and the production market share over 28%. Many European players have plants in USA due to rich plasma source. So there are a large number of Human Coagulation Factor VIII for import from other regions. Asia is another important market of Human Coagulation Factor VIII, enjoying 10% production market share and 11% sales market share. Especially in China, the sales and price of Factor VIII are controlled by country, and the price in China is different from other regions. Main players are from USA and Europe, like Baxter, Bayer, and they have many plants in other regions. China also can supply Human Coagulation Factor VIII, but the products are mainly consumed in China. Market competition is intense. Baxter, Bayer, CSL, Pfizer, Grifols, etc. are the leaders of

the industry, and hold key technologies, with high-end customers, have been formed in the monopoly position in the industry. However, with further expanding market, there will be more manufactures in the future.
