The global Humic Acid market was valued at 100.64 Million USD in 2021 and will grow with a CAGR of 4.56% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Humic acids are the water soluble organic acids naturally present in soil organic matter. Humic acids are not a single compound, but rather a collection of different molecular weight compounds with similar characteristics. They are usually defined by the process through which they are isolated, rather than by a particular chemical structure. Humic Acid provides a source of soil building carbon. Raw materials of humic acids include peat, brown coal, weathered coal and others. Raw material resources are abundant. Also manufacture process is mature in this industry. So, there are many manufactures all over the world. Concentration degree in this industry is low. NTS, Humintech, Humic Growth Solutions, Creative Ideas, Omnia Specialities Australia, Canadian Humalite International, Grow More, Humatech, AMCOL International, HCM Agro and Jiloca Industrial are global major manufacturers. Humic acids have many applications in agriculture, animal feed, environmental protection or others. Among all uses, humic acids consumption in agriculture is large, which took a share of 78.10% in 2015. In the future, we predict that agriculture demand for humic acids will continue to increase.
