In residential, industrial or commercial buildings, heating or cooling is implemented by heating, ventilation, and air conditioning (HVAC) equipment. Rising population has opened up new avenues for the global HVAC equipment market. Regions like Asia-Pacific are witnessing rapid growth in residential properties, with China and India in the driver's seat. The largest producer of HVAC equipment is China. It is highly influenced by increasing construction expenditure and rising industrialization. Latest technological breakthroughs have assisted the advancement of new HVAC equipment in the residential segment across the world. This can make the overall processes more efficient, and can significantly improve accuracy in various applications. Growing number of housing units are opening up new arenas for HVAC equipment installations. The residential segment is poised to grow at a faster rate and air conditioner manufacturers were able to increase their top line in Asia-Pacific, because of increase in atmospheric temperature in the region. Inverter ACs are expected to be adopted more in India, as the region is struggling with power shortage; even cities have regular power cuts. All these factors are delivering and creating an impact in the residential market.
