## Abstracts

The global Hydraulic Hammer market was valued at 1675.23 Million USD in 2021 and will grow with a CAGR of .41% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The hydraulic hammer, also known as rock breaker, hydraulic breaker and hydraulic chisel, is a type of hydraulic tool or attachment that is used in demolition jobs which involve breaking up of large blocks and slabs of concrete and in excavation and quarrying of rocks and minerals. Hydraulic hammers are the modern descendants of pile drivers. Pile drivers are mechanical devices used to stake piles into the ground to lay the foundation for buildings. The advent of diesel, hydraulics, and pneumatics helped deliver the force needed to drive piles into the ground and accomplish larger construction projects. Hydraulic devices like the hydraulic hammer are based upon the theories of fluid mechanics and the work of Blaise Pascal and Daniel Bernoulli. A hydraulic system consists of a liquid, pump, pipes, motor, and output device. Hydraulics provides motive power to activate machinery by converting pressure exerted on a confined liquid medium into mechanical output. Pressure that is exerted on the enclosed, incompressible liquid is transferred equally in all directions and areas of the hydraulic system and is transmitted undiminished to the output device, which in this case is the hammer. After several month survey, we found that Hydraulic Hammer market is not so concentrated. Rammer, Atlas-copco (Krupp), Montabert (Joy Global),

Furukawa, and Eddie are top 5 manufacturers in Hydraulic Hammer market but total production of these five manufacturers only takes a total 24.29% in 2016. There are many small manufactures in the world.
