The global Hydro Fluoric Acid market was valued at 75.89 Million USD in 2021 and will grow with a CAGR of 11.97% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Hydrofluoric acid is a solution of hydrogen fluoride (HF) in water. It is a colourless solution that is highly corrosive, capable of dissolving many materials, especially oxides. In consumption market, the growth rate of global consumption is fast relatively. China is still the mainly consumption regions due to the advanced downstream industries and rapid development of economy. However, the demand in China is mainly concentrated in the field of EL grade. The major raw material for Electronic Grade Hydrofluoric Acid is AHF. In the global market, supply of raw materials is full. Initial materials fluorite mainly concentrated in China, Mongolia, South Africa and Mexico. In the world wide, giant manufactures mainly distribute in those areas. China has a long history and unshakable status in this industry. Fluctuations in the price of the upstream product will impact on the production cost of Electronic Grade Hydrofluoric Acid industry. The price changes in 2017 are mainly due to the sharp rise in the price of fluorite.
