Hydro turbines are devices used in hydroelectric generation plants that transfer the energy from moving water to a rotating shaft to generate electricity. These turbines rotate or spin as a response to water being introduced to their blades. These turbines are essential in the area of hydropower - the process of generating power from water. Globally, the hydro turbines industry market is concentrated as the manufacturing technology of hydro turbines is relatively immature. And some enterprises, like Andritz, Voith, GE, etc. are well-known for the wonderful performance of their Hydro Turbines. At the same time, Asia-Pacific, occupied 60% sales market share in 2019, is remarkable in the global hydro turbines industry.
