The global Hydrodesulfurization Catalyst market was valued at 111.04 Million USD in 2021 and will grow with a CAGR of 1.32% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Hydrotreating, formally known as hydrodesulfurization (HDS), is a chemical process used on natural gas and refined petroleum. The aim of this process is to decrease the amount of sulfur in the petroleum by increasing the amount of hydrogen in the product. This is done for a variety of reasons, such as decreasing the environment impact when these petroleum products are used, and to keep the reforming units that process the petroleum from being poisoned. Most of the sulfur produced annually comes from this process. The global Hydrodesulfurization Catalyst industry has a rather high concentration. The major manufacturers are concentrated in USA, China and Europe, such as Advanced Refining Technologies (ART), Albemarle Corp, Criterion, Honeywell UOP, Haldor Topsoe A/S, Axens S.A, Johnson Matthey PLC, JGC C&C, Sinopec and CNPC. At present, Criterion is the world leader, holding 19.56% production market share in 2016. Hydrodesulfurization Catalyst can be mainly divided into Load Type and Non-Load Type which Load Type captures about 93.10% and Non-Load Type captures about 6.90% of Hydrodesulfurization Catalyst market in 2016. According to our research and analysis, manufacturers from USA are the major leaders in the international market of Hydrodesulfurization Catalyst.
