The global Hydrotalcite (CAS 11097-59-9) market was valued at 27.68 Million USD in 2021 and will grow with a CAGR of 5.08% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Hydrotalcite is a Layered Double Hydroxide whose name is derived from its resemblance with talc and its high water content. Layered double hydroxides (LDH) comprise an unusual class of layered materials with positively charged hydroxide layers and charge balancing, mobile anions located in the interlayer region. This structure gives these material anion-exchange properties. The natural form of hydrotalcite is mined in small quantities in the Snarum area of Norway and the Ural area of Russia. Carl Christian Hochstetter (1842) was the first to report about hydrotalcite, which was attached firmly to a schist. He described a white material with a pearl like luster, with the formula $Mg_6Al_2(OH)_{16}CO_3 \cdot 4H_2O$. In the short run, the market will maintain growth in a stable level and the price will fluctuate on a small scale. In addition, the global giants have the advantage of market position and be the dominant one; they maybe consolidate their market position through expanding, acquisition and merging. In the past years, from 2008 to 2010, Kyowa Chemical, Clariant(S?d-Chemie) and Sakai Chemical Industry massively expanded the production capacity of Hydrotalcite. In China, SaekYunghs (Hengshui) New Materials and GCH TECHNOLOGY started to produce Hydrotalcite in 2014 and 2015, and they both have planned to expanded their

capacity in the next few years, especially SaekYunghs (Hengshui) New Materials, has planned to expand its Hydrotalcite to reach 40000 tons Shandong province in future, from 1000 tons in 2018. If implemented, it will have important influence on the global Hydrotalcite market. GCH TECHNOLOGY also planned to expand the capacity to 5000 tons in future.
