The global Hydroxyapatite market was valued at 117.8 Million USD in 2021 and will grow with a CAGR of 6.55% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

This report studies the Hydroxyapatite market, from angles of players, regions, product types and end industries, to analyze the status and the future. Hydroxyapatite (HAp) is a calcium phosphate similar to the human hard tissues in morphology and composition. Particularly, it has a hexagonal structure and a stoichiometric Ca/P ratio of 1.67, which is identical to bone apatite. Hydroxyapatite is chemically similar to the mineral component of bones and hard tissues in mammals. It is one of few materials that are classed as bioactive, meaning that it will support bone ingrowth and osseointegration when used in orthopaedic, dental and maxillofacial applications. At present, the major manufacturers of Hydroxyapatite are concentrated in SofSera, Fluidinova, Bio-Rad, Bonesupport AB, Sigma Graft, Berkeley Advanced Biomaterials, etc. SofSera is the world leader.
