Abstracts

The global Immobilized Trypsin market was valued at .93 Million USD in 2021 and will grow with a CAGR of 5.32% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Immobilized Trypsin provides a fast and convenient method for digesting a range of concentrations of purified protein or complex protein mixtures. Digested peptides are easily separated from the Immobilized Trypsin as they flow through the spin column into the collection tube. Immobilized Trypsin is easily removed from the peptide solution because the trypsin does not pass through the column frit. Trypsin is a proteolytic enzyme, which cleaves at the carboxyl side of positively charged Lysine (Lys) and Arginine (Arg). When these amino acids are followed by the nonpolar Proline (Pro), the digestion of the site is not efficient. When Lys and Arg are followed by acids [Aspartic Acid (Asp) and Glutamic Acid (Glu)] the digestion is also not as efficient. North American is the largest consumption place, with a consumption market share nearly 45% in 2019. Following North American, Europe is the second with the market share of 28.39%. Market competition is intense. Promega, Thermo Scientific, G-Biosciences, SignalChem and Takara, etc. are the leaders of the industry, and they hold key patents, with high-end customers. Top 5 occupied 3/5 of the market in 2019. According to the form, the classification of Immobilized Trypsin includes 2 ml, 4ml, etc. In addition, the proportion of 2 ml in 2019 is about 70.63%. Immobilized Trypsin is widely used for Academic &

Research Institutes and Pharmaceutical Companies. The most proportion of Immobilized Trypsin is used for Academic & Research Institutes, and the proportion in 2019 is about 62.15%.
