Immunoassay is a test that measures the concentration of analytes in blood samples, this is done by an instrument known as immunoassay analyzer. This instrument measures the presence or concentration of proteins in analyte samples; using antigen-antibody binding properties. The industry is rapidly growing due to the constant introduction and adoption of automated as well as advanced techniques for laboratory instruments and analyzers in developed countries. Rising prevalence of infectious diseases and chronic conditions, which require early diagnosis, prevention, and treatment, is one of the main factors boosting the demand for immunoassay analyzers and compact consumable products in the healthcare sector.
