Indocyanine green (ICG) a cyanine dye used in medical diagnostics to determine cardiac output, hepatic function, and liver blood flow, and for ophthalmic angiography. It is a sterile, lyophilized green powder with a peak spectral absorption at 800 nm. These infrared frequencies penetrate retinal layers, allowing ICG angiography to image deeper patterns of circulation than fluorescein angiography. Akorn is the dominate producer of indocyanine green, the production was 536.6 K NOS in 2015, accounting for about 25.80% of the total amount, followed by PULSION Medical Systems AG, with the production market share of 16.19%.
