The global Industrial Biomass Boiler market was valued at 7424.76 Million USD in 2021 and will grow with a CAGR of 9.11% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Industrial biomass boiler generates energy from the biomass that comprises of agricultural and forest residues, urban waste, residues and industrial waste. Industrial biomass boiler heats the biomass residue for cost-effective generation of electricity. There's an extensive adoption of industrial biomass boilers since the energy generation from industrial biomass has least adverse impact on the environment as against the energy generation from fossil fuels. The increasing focus of governments across the globe to reduce the dependency on fossil fuel and related emissions, has compelled utilities and the manufacturing industries to replace fossil fuel with alternate fuels.
