## Abstracts

The global Industrial Computed Tomography market was valued at 153.84 Million USD in 2021 and will grow with a CAGR of 7.25% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The Industrial Computed Tomography market covers High Energy Industrial CT, Low Energy Industrial CT, etc. The typical players include GE Measurement & Control, Yxlon International, ZEISS, Nikon Metrology, North Star Imaging, etc. X-ray computed tomography is a well-known method in clinical diagnostics, which is becoming more and more present in the field of industrial NDT. While the basic principles are common for both fields, a medical CT scanner requires a complex system of a rotating X-ray source and detection system - the so called gantry - to keep the patient in a stable position, whereas in an industrial CT system, the object itself can be easily rotated by a turntable. An increasing number of industries are discovering that X-ray CT scanning is a vital tool to ensure the highest product quality. Some of the key uses for industrial CT scanning have been flaw detection, failure analysis, metrology, assembly analysis and reverse engineering applications. Major players in the industry include GE Measurement & Control, Yxlon International and ZEISS, which accounted for 24.30%, 13.96% and 14.77% of revenue in 2019, respectively. By region, the European region had the highest share of income in 2019, at 50.1 percent.
