The global Industrial Coupling market was valued at 1912.64 Million USD in 2021 and will grow with a CAGR of 3.81% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Industrial coupling is a component that connects two shafts axially and transmits torque and motion. It has a certain ability to compensate for the deviation of the two shafts. In order to reduce the vibration of the mechanical transmission system and reduce the impact peak load, the coupling should also have certain cushioning and shock absorption performance. The coupling sometimes also has an overload safety protection function. Global Industrial Coupling key players include Rexnord Corporation, Renold, Martin, KTR Systems, Lovejoy, etc. In terms of product, Snake Spring Coupling is the largest segment, with a share over 25%. And in terms of application, the largest application is Oil and Gas, followed by Food Processing, etc.
