## Abstracts

The global Industrial Insulators market was valued at 6333.75 Million USD in 2021 and will grow with a CAGR of 3.06% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Industrial insulators are used to create air gap for ensuring an effective insulation between two or more conductors. Insulators form an integral part of transmission and distribution and help in resisting stresses as well such as against heat, cold, and contamination. Modernization of outdated transmission and distribution (TandD) technology in developed nations along with the adoption of renewable power across the globe are some key drivers boosting the growth of market. Industrial insulators form an integral part of TandD infrastructure and are used in substations to provide electrical insulation and mechanical support for various electrical components. Hence, increase in TandD investments and the installed TandD line length over regions such as Asia-Pacific and North America has also fostered the demand for industrial insulators.
