Inositol is a naturally occurring nutrient that is usually classified as a carbocyclic polyol. The most common form is sometimes referred to as myo-inositol. In the human body, it plays a major role in preventing the collection of fats in the liver, as well as promoting healthy hair growth. The presence of the nutrient also aids in efficient processing of nutrients into the conversion of energy, which in turn helps the body to maintain a healthy metabolism. It also can be considered brain food, as the nutrient is necessary to properly nourish the brain. The industry's leading producers are TSUNO, Zhucheng Haotian Pharm and Falcon Wealth(Jilin), with a combined revenue ratio of about 64%.
