Abstracts

The global Instant Camera's Consumable (photo film & photo paper) market was valued at 14.78 Million USD in 2021 and will grow with a CAGR of 5.68% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Instant film is a type of photographic film introduced by Polaroid to be used in an instant camera (and, with accessory hardware, many other professional film cameras). The film contains the chemicals needed for developing and fixing the photograph, and the instant camera exposes and initiates the developing process after a photo has been taken. Currently, Fujifilm, Polaroid and Leica are the leaders of instant film industry. Fujifilm is a global leader. In 2017, the sale of Fujifilm was 523 million units, and the company held a sales share of 90.2%. Leica, Kodak and HP are new entrants to the industry. In a short period of time, these companies cannot shake Fujifilm's market position. GIR analysts believe that Fujifilm will continue to lead the market. In the past few years, the digital camera market has performed poorly. In a further blow to the digital camera market, Fujifilm's recent financial windfall came from the Instax line of instant film cameras. Further signaling the continuance of a trend reported by other camera manufacturers, the digital camera market is being outpaced and displaced by the ubiquitous and profitable smartphone camera segment. The increase in the sales of instant camera is surprising. Fujifilm has recently released their FY2018/Q3 financial

report, showing that the sales have increased over this period. Interestingly, it's not their digital mirrorless cameras that boosted the earnings. It's the Instax line of instant film cameras.
