## Abstracts

The global Insulating Glass Units market was valued at 324.98 Million USD in 2021 and will grow with a CAGR of 1.22% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Insulating glass units, or IGUs, are designed to keep homes warmer in colder weather and cooler in warmer weather. An insulating glass unit commonly consists of two (sometimes more) panes of glass separated by a spacer material and sealed together at the edge. The insulating airspace is filled with air or a noble gas, such as argon or krypton inside, and some IGUs may be coated with special materials. This enables the glass to meet two very different requirements, keeping heat in during colder weather and keeping heat out during warmer weather. The global insulating glass units industry mainly concentrates in the China, EU, and NAM. The manufacturers are not that concentrate, they scattered around the world. And some enterprises, like AGC, Guardian Industries, Saint-Gobain, etc. are well-known for the wonderful performance of their insulating glass units and related services. At the same time, China, occupied 53.53% production volume market share in 2015, is remarkable in the global insulating glass units industry because of their market share and labor status of insulating glass units. The consumption volume of insulating glass units is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of insulating glass units industry may

not keep that fast. But it is surely forecasted that the market of insulating glass units is still promising. Despite the presence of competition problems, due to the global recovery trend is clear, emergence of technological advancements, investors are still optimistic about this area, the future will still have more new investment enter the field. But it is suggested that enterprises those have plans to enter this industry have careful analysis of this market and the advantages or disadvantages of themselves.
