Abstracts

The global Insulin Delivery Devices market was valued at 1070.66 Million USD in 2021 and will grow with a CAGR of 3.6% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Insulin Delivery Devices include syringes, pens, pumps, and others. The cost of syringes and insulin pens is low, which enables users to opt for them as first choice devices. High cost of insulin pumps and insulin jet injectors poses a challenge to the growth of the market. Insulin pumps and jet injectors also require special care and maintenance, which is an additional cost burden to patients. In 2017, the insulin pens segment accounted for the largest share of the global insulin delivery devices market. The insulin pens segment is further divided into reusable pens and disposable pens.
