The global Intelligent Flow Meter market was valued at 589.97 Million USD in 2021 and will grow with a CAGR of 3.08% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Intelligent flow meters are used to measure fluidic phenomenon in a wide range of industrial as well as commercial applications including oil and gas, food and beverages, pharmaceutical industry and power generation. An intelligent flow meter is used to measure the velocity of a fluid with ultrasound or any other technique to calculate the volume flow. Intelligent flow meters remain unaffected from temperature, viscosity, density and any suspended particulates. Intelligent flow meters are electronic meters and thus does not involve any moving parts unlike mechanical flow meters. Flow meters is the quantification of bulk fluid movement. Flow can be measured by contact type or non contact type sensors but intelligent flow meters involve non contact type of measurement of fluid flow. Intelligent flow meters usually sends a laser beam or an ultrasonic beam to the moving liquid which gets reflected back from the moving liquid and the movement or velocity of the moving fluid is displayed on the screen. The intelligent flow meters are widely used in fluid industries to check the fluid flow inside the pipes as well as to maintain the fluid flow in such pipes. APAC held the largest share of the intelligent low meter market in 2017; the market in APAC is expected to grow at a high rate between 2018 and 2025. The growing industrial infrastructural activities,

increasing demand for accurate and effective devices to measure the fluid, rising population, and urbanization in this region are the major factors driving the growth of the intelligent flow meter market in APAC.
