The global Internal Gear Pumps market was valued at 568.37 Million USD in 2021 and will grow with a CAGR of 4.97% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The internal gear pump is non-pulsing, self-priming, and can run dry for short periods. They're also bi-rotational, meaning that the same pump can be used to load and unload vessels. Because internal gear pumps have only two moving parts, they are reliable, simple to operate, and easy to maintain. Globally, the internal gear pump industry market is less concentrated as the manufacturing technology of internal gear pump is relatively mature. And some enterprises, like Bosch Rexroth, Sumitomo Precision and Viking Pump, etc. are well-known for the wonderful performance of their internal gear pump and related services. At the same time, Europe, occupied 26.30% sales market share in 2017, is remarkable in the global internal gear pump industry because of their market share and technology status of internal gear pump.
